**NOTICE OF ALLOWABILITY*****Allowable Subject Matter***

It is the opinion of the examiner that the art of record (considered as a whole) neither anticipates nor renders obvious “a first drive structured and arranged to intermittently rotate the workpiece holder about a longitudinal axis of a workpiece held in the workpiece holder, a second drive, separate from the first drive, structured and arranged to rotate the at least one forming tool to act periodically on the workpiece; and an electronic control operably connected to the first drive and the second drive, which controls intermittent rotational movement of the workpiece holder based upon the second drive, wherein the at least one forming tool comprises profiled wheels or rollers that are driven to continually rotate along a circular orbit that is oriented parallel or obliquely to the longitudinal axis of the workpiece” in combination with the rest of the claimed limitations set forth in independent claims 11 and 30 and neither anticipates nor renders obvious “intermittently rotating an axially moveable workpiece holder about a longitudinal axis of a workpiece held in the workpiece holder; periodically acting on the workpiece with at least one forming tool; and controlling, with an electronic control, a first drive that causes the intermittent rotating and a second drive that causes movement of the at least one forming tool, wherein the at least one forming tool comprises profiled wheels or rollers that are driven to continually rotate along a circular orbit that is oriented parallel or obliquely to the longitudinal axis of the workpiece” in combination with the rest of the claimed limitations set forth in independent claim 23.
